ABOUT US

At ACE, we have the expertise to offer you innovative service packages in all aspects related to engineering, architecture, and contracting disciplines and areas to ensure uninterrupted user comfort and the smooth functioning of your building and projects. We have raised the bar in construction expertise and excellence in the Middle East. For decades, discerning developers and leading architects have turned to ACE to help bring their visions to life.

Innovative techniques, iconic designs, intricate details, and high-quality finishing are all part of the ACE hallmark. meaning we focus on the very best projects and most dynamic challenges, for the most imaginative and ambitious clients.

Over the years, the company has grown in scope beyond construction to encompass specialized design, including interiors and even furnishings.

We have grown from a trustworthy contracting firm to a unique and highly sought-after organization offering complete turnkey solutions, with access to a network of world-class names in architecture and engineering.

Main Service

01 Construction Consultant

ACE United Engineers offers construction consultancy in the form of development and support of a construction project by developing the design, scheduling, budgeting, risk assessments, contract administration, in-site testing, monitoring, inspecting the work of contractors, giving advice to assist our clients in the pre-construction and construction phases of the project. We also provide post construction works by providing maintenance.

03 MEP Services

MEP, Mechanical, Electrical, and Plumbing, is at the core of maintaining and protecting the value of a construction project.

It's our commitment to provide expert technicians with specialist knowledge to design, implement, and maintain the MEP components of a construction project.

05 HVAC Electrical System

At ACE United Engineers, our HVAC team is responsible for installing and maintaining the electrical components in an HVAC system, including all electrical wiring and controls. These are mostly heating and air conditioning systems, but also include ventilation, refrigeration or other climate-control systems. Our focus is on large facilities such as office buildings, schools, hospitals, and factories.

07 Renewable Energy Services

A Complete Solutions with Innovative Design and Professionally finished Installations with full Operation and Maintenance

Our Complete Services Includes:

- Project development and Design
- Project financing and investment
- Project construction management
- Operations and maintenance

02 Reconstruction Services

Reconstruction in architectural conservation is the largely prototypical restoration of damaged or destroyed architectural monuments, historical buildings or parts of buildings. Reconstruction is defined as the returning of a damaged building to a known earlier state by the introduction of new materials. Reconstruction is related to the architectural concepts of restoration in which repairing existing building fabric takes place and preservation of the building.

04 Architectural Design

Control project from starting to finish to ensure high quality, innovative and functional design. Take the "brief to identify clients' needs and put together feasibility reports and design proposals.

- Develop ideas keeping in mind client's needs, buildings usage and environmental impact.
- Produce detailed blueprints and make any necessary corrections.
- Compile project specifications.
- Keep within budgets and timelines.
- Ensure that all works are carried out to specific standards, building codes, guidelines and regulations.
- Make on site visits to check on project status and report on project.
- Cooperate and liaise with construction professionals.
- Follow architectural trends and advancement.

06 General Contracting

We are committed to create and manage a construction project. In addition to organizing and managing the project site. Our engineers will handle most of the site monitoring and testing. We also, hire subcontractors and manage their quality of work. Lastly we will assist with safety procedure and protocols on site.

WHY CHOOSE US?

-  We have 45 plus years in the construction and Project Management industry
 -  we delivered high-quality Constructions standards in all our projects
 -  We work with the best and stable group of partners and subcontractors image
 -  Our ACE project management team does the work Faster.
 -  Our Employees are continually trained on safety issues.
 -  With the help of our highly skilled engineers, we not only construct a project of the utmost respectability but also maintain projects at a high standard.
